

ISP1507-DK

Development Kit for BLE/ ANT+/ NFC Module

In order to assist clients in developing their Bluetooth Smart solutions based on the ISP1507, Insight SiP offers a Sensor Development Kit. Using this development kit, product developers can use a working solution as starting point to develop their own products. Time to market is saved by avoiding starting from a blank sheet of paper.

General Description

- One Interface Board with integrated J-Link OB JTAG/SWD Emulator
- A Master Development Dongle
- One Test Board with ISP1507
- One NFC antenna
- 5 sample units ISP1507
- One Sensors Board ISP131001
- Cables and battery holder

Ordering Information

The dev kit is available with the following configurations (refer to ISP1507 data sheet):

- **ISP1507-AX-DK**
Compliant with BLE protocol and integrating 512 K Flash / 64 K RAM memories

Design Service

If a product developer lacks skills in any of the crucial areas to develop a working solution, then Insight SiP can offer custom design services to cover all of the following areas:

- Custom hardware development
- Addition/replacement of different sensors
- Software development
- Custom SiP development
